

EXPERIENCE THE WTC DIFFERENCE

VIRTUAL EDGE TECHNOLOGY

BEING ON TOP OF TODAY'S FASTENER INDUSTRY REQUIRE TODAY'S INFORMATION TECHNOLOGY

In order to stay progressive and operate at the highest level, the cutting edge technology of today's IT has become more and more Industry specific. A Fastener company needs Fastener IT. We support large and small Fastener companies now, our success is proven and tangible. At WTC, Fastener Specific IT is what we do! Our goal is to take on the "IT headache" so you can operate and profit at optimal level. Allow WTC to manage your IT services and you will find you have more time to do what you do best building your company. Downtime costs money. Solutions can take days. Keeping up with a changing IT environment can be difficult with your own business to operate. WTC will provide proven Solutions. WTC studies, evolves, and migrates with the changing pace of Fastener IT processes. Your long term relationship with WTC will provide the needed change in current IT processes and those changes necessary for the future.

TRUST YOUR IT MANAGEMENT TO WTC

Close the loop and obtain a realistic level of IT processes to help reduce variability and improve organizational performance on a continuing basis. WTC brings 100+ years of combined experience with significant discipline, process excellence, resources, and constant modernization that your company demands or will demand. Many of those years are specifically involved in distribution, manufacturing, and logistics in the Fastener and Allied industries. WTC isn't just another IT business, we are an IT business for the Fastener Industry!!

WHY YOU SHOULD OUTSOURCE TO AN OUTSIDE FASTENER SPECIFIC IT COMPANY?

- IT problems keep piling up and there is no end in sight
- Current IT team or arrangement doesn't have the depth or breath of knowledge to design, implement, and support IT services. Especially when they fall short of being Fastener exclusive
- IT is viewed as a problem instead of a solution
- IT is a necessary evil and not the enabler for business
- IT is not currently viewed as strategic to the company
- Budgets are increasing every year, but the preceived "ROI" of IT is low
- There are no strategic IT plans, no defined directions. Current IT has gone stale and lacks migration
- Current IT practices simply hinder your business, not enhance it as they should
